WHO WE ARE

Transform IT

XITD is a young and dynamic team that has been designing, deploying and managing, various scales of IT environments for the past 15 (or so) years. We are a client-centric organisation and pride ourselves in our responsive service delivery and innovative attitude. Our core considerations of reliability and resilience (and of course a little performance!) come through in our client designs and allow us to put our client environments on the best path to their digital transformation.

CORE VALUES

OUR SERVICES

Professional Services

From small to large infrastructure projects, lean on us to assist with the architecture, deployment and project management. Fixed price, fixed outcome, we're ready for your next move.

Support & Management

Outsource and let us keep an eye on your technology stack. Unlimited support on every plan, skip the headache and rather have an ITIL-aligned service desk and certified techs deal with it.

Cloud & Hosted

The cloud is our happy place. Whether it be your own virtualised private server(s), a virtual data centre of your own, your equipment collocated, or on-premise services you'd prefer to take off-site.

Backup & DR

If you're like us, your information systems are at the core of your business. Offering complete data management, unifying backup and recovery, DR, archiving and search and insight

Cyber Security

With certified security engineers on staff and Gartner leading vendors in the portfolio, feel free to check the security box in your compliance checklist.

Microsoft 365 & Azure

From migrations to management, Exchange to Azure. Best-practice and attention to detail come second nature to our team, bringing with it a no-hassle, seamless, Microsoft cloud experience.

Communication

Managed telephony and unified communication solutions that were built for flexibility and reliability. Deployed to global best-practice and monitored remotely for quality and reliability.

IT Compliance

Whether it be regulatory or internally imposed compliance directives. Leverage our expertise and compliance-winning technology to make sure your audits are passed with ease.

IT Procurement & Financing

Hardware, software, licensing and the knowledge to assist you with finding that exact fit for your business. Not keen on an upfront payment? We can finance any equipment to your requirements.

PARTNERSHIPS

We believe in
building strong
relationships
